Enterprise AI Engineering, Built to Be Owned

INT.AI designs, develops, deploys, and maintains intelligent systems tailored to the unique needs of organizations — combining advanced machine learning, large language models, intelligent agents, and enterprise-grade infrastructure.

Unlike traditional AI providers that offer access to generic models through subscription APIs, INT.AI empowers businesses to own and control their AI infrastructure end to end.

Our solutions deliver scalable, secure, and highly customized AI systems that become a permanent part of an organization's technical foundation — not a rented capability.

What We Are Not

A reseller of generic chatbot subscriptions or a thin wrapper around a third-party API.

What We Are

An engineering partner that builds, deploys, and maintains AI infrastructure your organization owns outright.

Intelligence as a Strategic Asset

We believe that intelligence should become a strategic asset owned by every organization — not rented from third-party providers.

Our mission is to build AI systems that operate as an integral part of an organization's business, infrastructure, and knowledge — engineered for the long term, not the next billing cycle.

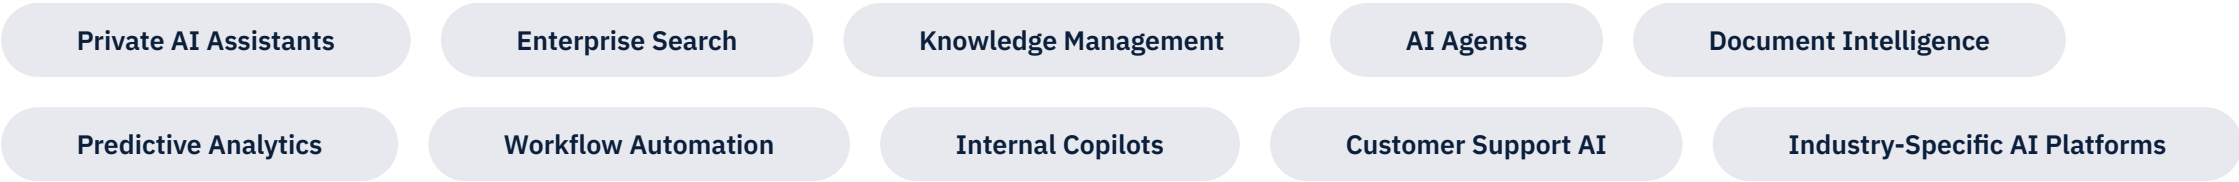

The Cost of Renting Intelligence

Modern organizations increasingly rely on external AI providers. As adoption grows, the following challenges become critical.

- 01 High recurring API costs
- 02 Vendor lock-in
- 03 Data privacy concerns
- 04 Limited customization
- 05 Compliance challenges
- 06 Lack of infrastructure ownership
- 07 Performance limitations for domain-specific tasks

A Full Intelligent Ecosystem, Not a Chatbot

INT.AI delivers fully customized enterprise AI systems. Instead of integrating a chatbot, we build an intelligent ecosystem designed specifically for your organization.

What We Deliver

AI Strategy Consulting

We help organizations identify AI opportunities, define implementation roadmaps, and assess technical readiness.

Enterprise AI Development

Custom AI systems built specifically for your business processes, not adapted from a generic template.

Large Language Model Integration

Selecting, adapting, fine-tuning, and deploying open-source foundation models suited to your workloads.

Retrieval-Augmented Generation (RAG)

Knowledge systems powered directly by your company documentation and structured data.

What We Deliver

Intelligent AI Agents

Autonomous agents capable of executing business workflows across enterprise systems.

Fine-Tuning

Customizing foundation models for industry-specific language, terminology, and tasks.

AI Infrastructure

Complete deployment pipelines for scalable, production-grade enterprise AI.

AI Maintenance

Continuous monitoring, optimization, updates, and performance improvements after go-live.

A Disciplined, Five-Phase Delivery Model

Domain-Specific AI, Built for Regulated Sectors

Banking

- Fraud Detection
- Financial Assistants
- Risk Analysis
- Compliance

Healthcare

- Medical Documentation
- Clinical Search
- Patient Support
- Medical Knowledge Systems

Manufacturing

- Predictive Maintenance
- Industrial AI
- Quality Assurance
- Knowledge Management

Logistics

- Route Optimization
- Inventory Intelligence
- Demand Forecasting
- Warehouse Automation

Domain-Specific AI, Built for Regulated Sectors

Legal

- Contract Analysis
- Legal Research
- Case Intelligence
- Document Automation

Government

- Citizen Services
- Secure AI
- Document Management
- Knowledge Systems

Education

- AI Tutors
- Research Assistants
- Learning Platforms
- Administrative Automation

Technology

- Developer Assistants
- Internal Copilots
- Knowledge Search
- Support Automation

From Raw Data to Business Value

A consistent reference architecture underpins every INT.AI deployment, from ingestion through to the applications your teams use every day.

Enterprise Security by Design

INT.AI follows enterprise security principles across every engagement, whether hosted on your infrastructure or ours.

- On-Premise Deployment
- Private Cloud Deployment
- End-to-End Encryption
- Role-Based Access Control (RBAC)
- Audit Logging
- Identity Integration
- Data Residency Support
- Compliance-Oriented Architecture

Deploy On Your Terms

MAXIMUM SECURITY

Fully On-Premise
Deployed entirely within your own infrastructure, for organizations with the strictest data control requirements.

SCALABLE

Private Cloud
Dedicated private cloud infrastructure that scales with demand while remaining fully isolated to your organization.

BALANCED

Hybrid
The best balance of flexibility and control, combining on-premise and cloud resources where each fits best.

FULLY MANAGED

Managed AI Platform
INT.AI hosts and manages the solution for you under an enterprise agreement, with full operational ownership.

Own It, Don't Rent It

Traditional AI APIs	INT.AI
Generic Models	Organization-Specific AI
Monthly API Costs	Long-Term Ownership
Vendor Lock-In	Full Control
Limited Customization	Tailored Intelligence
External Infrastructure	Private Deployment
Shared AI	Dedicated Enterprise AI

Proof, As We Deliver It

As our portfolio grows, this section will feature detailed stories from real engagements, including:

- Customer challenge
- Measurable outcomes
- Solution architecture
- Customer testimonial (with permission)
- Deployment timeline

Case studies coming soon

Real case studies will become one of our strongest sales assets — reduced support workload, faster document retrieval, and other measurable outcomes from live deployments.
